### Happy Birthday!

Jake T.

4/23

Brantley G.

4/30

## Center News!

### Center Based

Ms. Peggy & Ms. Caitlin will be working with the children sowing seeds, while observing and documenting the growing process into viable living plants. Children will also witness the emergence of butterflies through active metamorphosis of live caterpillar's within the classroom. In addition they will learn about ants and how they survive, and how they work together through underground tunneling networks.

### Home Based

Ms. Laurie will be examining the outside environment with her children and families utilizing information learned from the WOUB training, "How to Spark Scientific Inquiry With Nature." They will be discussing animal and plant life cycles and exploring nature freely, promoting curiosity and scientific inquiry.

### Early Head Start

Ms. Patti will be focusing on Physical health and problem solving skills. Physical activity bolsters muscle growth, healthy heart and lung function, and improves coordination, balance, posture and flexibility. When children are involved in fun, child driven physical activities it gives them a sense of ownership increasing their confidence and self esteem, helping to promote an overall feeling of stability and cognitive balance.

### Family Support

Ms. Laurie will be working with the families to help ease the transition from Head Start to Kindergarten by arranging a field trip to public school. She will also be focusing on re enrollments, recruitment, and filling available spots for Head Start for the next upcoming school year.
