CENTER NEWS!

Center Based - The Center based classroom will continue working on Kindergarten readiness skills, through a variety of learning modalities such as book readings, small group activities and discussions. They will also be taking a field trip to a Kindergarten classroom. In addition, the whole class will be learning about insects, flowers, gardens and the summer season.

Early Head Start - EHS will be exploring all things scientific. When children are given the opportunity to indulge in scientific inquiry it nurtures their sense of curiosity, giving them the push to expand on ideas and a better understanding of fundamental concepts. Through verbal and/or nonverbal cues children are able to stimulate and prompt the cognitive mechanisms, which are crucial to understanding an amplitude of scientific processes. Some activities that promote this growth include sink or float, creating a nature collage, and exploring textures.

Home Based - Ms. Laurie will continue to work on Kindergarten readiness skills and transitioning. She and her kindergarten aged children will also be joining center based on their field trip, to get a glimpse into the Kindergarten classroom.

Family Support - Ms. Laurie will also be working on re-enrollments and completing family goals. If you need help with any last minute referrals or ideas on how to accomplish your goal, please reach out to her.

We are fast approaching the end of the school year! Where has the time gone?

The last day for center based children will be May 24, 2023. Home base services with Ms. Laurie will also halt May 24th. EHS with Ms. Patti will continue as normal.
